## SKILLS

### FRONTEND

Angular  
React  
TypeScript  
JavaScript  
Node.js  
HTML / CSS

### DATABASES

MySQL  
Postgres  
MongoDB

### MISCELLANEOUS

Git  
Agile Methodologies  
Object-Oriented Design  
WCAG  
Jest  
UI Design  
Elasticsearch  
Claude Code

### BACKEND

Ruby on Rails  
PHP  
Python

### APPLICATIONS

Adobe Photoshop  
Adobe Illustrator

## EXPERIENCE

### SENIOR FRONTEND SOFTWARE ENGINEER

RENAISSANCE EDUCATION

APRIL 2022 - JULY 2023

- Developed and maintained reusable frontend components and libraries for a large-scale, K-12 education software solution using React, resulting in an enhanced user experience that saw improved user engagement and conversion rates.
- Collaborated closely with the UX/UI team to create visually appealing and intuitive interfaces.
- Worked with QA engineers to ensure high code quality and comprehensive test coverage.
- Liaised with the backend team to define API requirements and resolve integration issues.
- Conducted code reviews, mentored mid and junior developers, and provided technical guidance to ensure adherence to best practices and coding standards.

### SENIOR FRONTEND SOFTWARE ENGINEER

DOTDASH MEREDITH

JULY 2021 - APRIL 2022

- Implemented responsive, cross-platform functionality in an extensible, custom-built frontend framework.
- Developed reusable UI components to streamline development and improve code quality.
- Collaborated with designers, QA engineers, and product managers in a dedicated scrum team to fully realize the product vision.
- Participated in code reviews to help ensure that code quality stayed high, and that best practices were observed.
- Mentored mid and junior team members on the application, architecture, and relevant technologies.
- Identified and prioritized technical debt.
- Optimized frontend performance by identifying and resolving performance bottlenecks.

## EDUCATION

### B.S. COMPUTER SCIENCE

UNIVERSITY OF ALABAMA MAY 2011

## INTERESTS

- Reading sci-fi, fantasy, and historical novels (and more!)
- Writing fanfiction
- Playing and modding video games
- Cable management
- Cosplaying at Dragon Con
- My Shih Tzu and houseplants

## EXPERIENCE

### SENIOR FRONTEND SOFTWARE ENGINEER

AIRBUS

AUG 2017 - FEB 2021

- Created and maintained the custom Angular component library, as well as the frontend design system and style guide.
- Setup the Angular monorepo that contained all of the frontend applications and libraries.
- Implemented shared code libraries with focus on reusability, modularity, and maintainability.
- Established code standards and ensured best practices were followed.
- Performed code reviews for the frontend team.
- Mentored mid- and junior-level teammates.
- Refactored parts of the codebase to keep technical debt in check.
- Developed interactive map features using OpenLayers.
- Collaborated with other software teams within Airbus to build FAA authorization tools for UAS pilots.
- Participated in product design meetings to develop new platform features.
- Established an official culture committee and held the position of Head of Culture.

### SOFTWARE ENGINEER

FYG.IO

DEC 2015 - JUN 2016

- Contributed to the standard library of an experimental language built on top of Lua.
- Researched ways to improve the development process and developer experience, with a focus on documentation.

### SOFTWARE ENGINEER

MAILCHIMP

SEP 2013 - OCT 2015

- Collaborated with the UX designers and other developers to design and implement user-facing features.
- Designed and optimized internal tools for customer service personnel.
- Contributed to Mandrill's technical blog with details of feature releases.

### SOFTWARE DEVELOPER

BRIGHTWHISTLE

JUN 2012 - AUG 2013

- Contributed to the development and maintenance of BrightWhistle's digital marketing platform using Ruby on Rails, MySQL, Bootstrap, SASS, and jQuery. Worked with the UX designer to develop a style guide for the new version of the client-facing console. Assisted the UX designer with both front and backend refactoring of the existing codebase.
- Designed and implemented a patient satisfaction survey app for iPads using CoffeeScript, HTML, and CSS. Integrated with the Facebook Pages API for posting survey results to the hospital's page if the user agreed to their ratings being public.
